DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4, 6-7, 10-11, 15-17 and 30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 1, 2 and 4 were amended on 12/23/2005 to require "during a normal braking operation". The original disclosure fails to provide antecedent basis for this limitation nor is it clear what types of braking operations correspond to "normal" operations.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 3683

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 10-11, 15-16 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Ohnuma (US# 6322168).

Ohnuma discloses all the limitations of the instant claims including; a power-operated hydraulic pressure source 12 operable to delivery a pressurized working fluid, a brake including a hydraulically operated brake cylinder; a manually operable brake operating member 30; a master cylinder disposed between said power-operated hydraulic pressure source and said brake cylinder and operable to deliver the pressurized working fluid into said brake cylinder, in response to an operation of said manually operable brake operating member; and a flow-rate changing device (26 and/or 34) disposed between said power-operated hydraulic pressure source and said brake cylinder and including said master cylinder 32, said flow-rate changing device being operable to change a relationship between a first rate of flow of the pressurized working fluid from said master cylinder into said brake cylinder, and a second rate of flow of the pressurized working fluid into said master cylinder, such that said relationship is changed according to an operating amount of said brake operating member (note element 34 changes the rate dependent on pressure level, valve 26 operates during brake assist in response to the pedal actuation) during a normal braking operation in which a pressure of the working fluid in said brake cylinder is controlled such that the pressure of the working fluid in said brake cylinder changes with a change of the

operating amount of said operation of said manually operable brake operating member.

Also note the 112 1st rejection above.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
